DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,386,942 B1 to Tang.

Tang discloses, regarding claim 7, a hollow doll head component (see figs. 4, 5), generally vertical reciprocable, openable and closable eye and mouth structures (see figs. 4, 5) movably mounted on the head component (see figs. 4, 5), and a single, shared, rotary drive device (see figs. 1-5) rotatably disposed within the head component (see figs. 4, 5) and operatively, drivably connected to the eye and mouth structures (see figs. 4, 5), whereby rotation of this device produces defined, coordinated, related, respective opening and closing motions in the eye and mouth structures (see figs. 4, 5). Regarding claim 8, a single, selectively power-operated drive motor (31) disposed within the head component (see figs. 4, 5) and drivingly connected to the drive device, operable to rotate the device (see figs. 4, 5).

Response to Arguments

Applicant's arguments filed on December 15, 2003 have been fully considered but they are not persuasive.

In response to applicant's arguments concerning the rejections made to claims 7 and 8, examiner apologizes for any misunderstanding resulting from what examiner intended to define the "single, shared, rotary drive device" to be. Examiner intended to state that the gear directly below and in immediate contact with the gear "32" be designated as the "single, shared, rotary drive device". This gear has no reference numeral, however, it is understood to be the main drive gear since it is directly connected to the motor drive shaft. This main drive gear is in rotational contact with, and drives the gears "32" and "35", which are respectively connected to the eye and mouth structures. Thus, this element clearly satisfies the limitation as claimed in claim 7: "single, shared, rotary drive device...operatively, drivably connected to the eye and mouth structures". The Tang reference remains sufficient in teaching all of the claimed limitations of claims 7 and 8. Examiner therefore reasserts the rejection.

Allowable Subject Matter

Claims 1-6 and 9-21 are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3712

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
